

ALPOLAN 638 2K PU Graphite Paint

Dear Ladies and Gentleman,

with **ALPOLAN 638 2K PU Graphite Paint** we offer an efficient coating material for the protection of foundry models and core boxes.

The product is easy to apply, shows very good adhesion to wood, synthetic resin or aluminum and prevents adhesion or sticking of the quartz sand to the model.

ALPOLAN 638 is available in the 1 l combi pack, consisting of 0.5 l of A component and 0.5 l of hardener:

Advantage: You can add the hardener directly to component A (into the can) and then mix thoroughly for 2 - 3 minutes. Application can be done directly afterwards.

The delivery in 5 l cans is also possible.

For further details on the product, please refer to the related technical data sheet. You can find this on our homepage:
